

T&M Specialists announce opening of T&M UK

HONG KONG, APRIL 1 2021 - T&M Specialists Hong Kong today announced the opening of T&M Specialists UK Limited.

Established in the UK in 2020, to undertake work on both UK and European infrastructure projects, T&M Specialists UK Ltd intends to build upon the already significant project portfolio of T&M Specialists Ltd., their sister company, which is based in Hong Kong and has been operating successfully since 2014.

T&M Specialists Ltd, is predominantly known for Ground Support & SCL Works, as well as providing EFNARC Standard Services Globally. T&M's decision to establish a UK branch demonstrates their intention to develop business opportunities and to support partners and clients throughout the region.

Whilst T&M Specialists Ltd (Hong Kong) are currently engaged in some Major Infrastructure Projects throughout Asia & North America, T&M Specialists UK Ltd., are busy tendering for some interesting UK projects and currently supporting a major European contractor for Micro-Tunnelling and Pipe-Jacking operations on projects throughout Europe.

ABOUT T&M SPECIALISTS

T&M Specialists, headquartered in Hong Kong with offices in Australia and the UK, is owned and operated by Louis Fraser, a certified EFNARC Nozzleman and Examiner with over 20 years international experience in Sprayed Concrete for both initial and permanent support.

T&M Specialists has built a reputation for successful projects around the world. The company is focused on Tunneling, Civil Construction, Geotechnical Investigation, and Manpower Services.

T&M Specialists differentiates itself by only employing specialised professionals and highly skilled workers delivering best practice throughout our operations. Lead by an experienced management team and an industry leading board of advisors, T&M Specialists has proven to be a trusted and reliable employer and business partner.
