Punchbowl, NSW 2196  
Australia

The JV see this as an important step in their future partnership. "There are a lot of contracts coming up in Australia and across the region where such equipment, as well as the specialised workforce we can provide, will be needed" said Louis Fraser, Managing Director of T&MSi. "We see this as a good opportunity to further expand our role in serving the Tunnelling and Mining industry and we greatly welcome interest from others who wish to work with us."

Managing Director of Endacom Fergal Hester added "This JV has been formed for working on major civil projects in Australia and the acquisition of this plant allows us to widen both of our company's portfolios."

The JV companies are currently working on numerous projects in Australia and the USA, which include the provision of shotcrete specialists and various training programs.

**We welcome you to use the details adjacent to contact Louis or Fergal directly.**

*T&M Specialists can provide operators with all equipment.*
